

# imy.up.ac.za

## FTP

### HOST:

Sftp://imy.up.ac.za

### USERNAME:

u+studentNumber (for example, u12345678)

### PASSWORD:

Your **password** can be found under “My Grades” on ClickUP.

### PORT:

8835

To FTP to the server from off-campus you will also need to install Global Protect, which you can access from here:

<https://gprotect.up.ac.za/global-protect/login.esp>

The login details for this page and once you install GProtect are the same as your ClickUP login details. For the portal you must use **gprotect.up.ac.za**.

## HOW TO ACCESS YOUR WEBSITE IN A BROWSER

Type **imy.up.ac.za/IMY220/username** into the address bar (where **username** is the same as in the FTP section).

You will get a popup that requires you to authenticate. Use the same **username** as specified in the FTP section. The password is only the password that can be found under “My Grades” on ClickUP.

If the authentication is successful, you will land on a page with the following text (unless you have already replaced the index.html file with your own, in which case, your splash page will display):

**IMY.up.ac.za**

Welcome to your hosting space  
This space is reserved for your website!

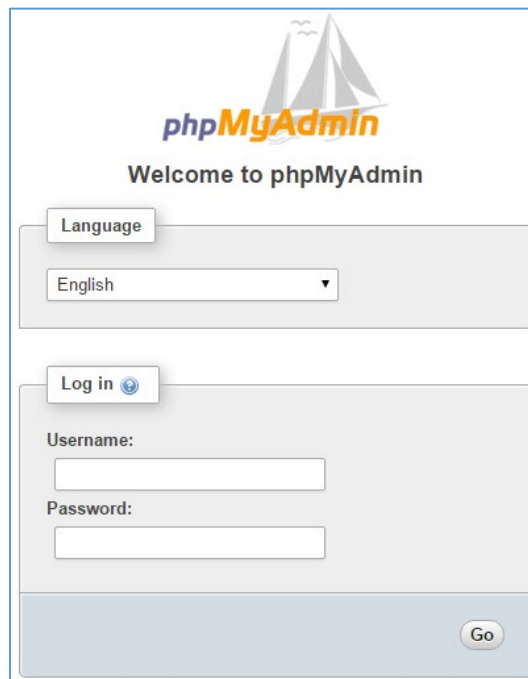

This page is the **index.html** file that is in the **root folder**. The root folder can be accessed when you FTP to the server. You have to **replace** this file with your own index file, therefore, when you go to **imy.up.ac.za/IMY220/username**, your **splash page** must display.

## HOW TO ACCESS PHPMYADMIN

Type **imy.up.ac.za/phpmyadmin** into the address bar in your browser.

You will land on a page that looks like the following screenshot:

---

### USERNAME:

u+studentNumber (for example, u12345678)

---

### PASSWORD:

Your **password** can be found under "My Grades" on ClickUP.

Use the database that has been created for you. The database name is your **username**. Do not create a new database.

## CONNECTING TO THE DATABASE WITH PHP

To connect to the database, use the following details:

---

SERVER NAME:

**localhost** (not imy.up.ac.za)

---

USERNAME:

u+studentNumber (for example, u12345678)

---

PASSWORD:

Your **password** can be found under "My Grades" on ClickUP.

---

DATABASE NAME:

Your **username** as specified in the FTP section, e.g., "u12345678".
