IMY 220
Project Progress:
Deliverable 2

Due: Friday 7 October @ 07:30

The submission instructions are available on ClickUP. Any deviation from these instructions will cause a 10% deduction from your mark.

Instructions

- Continue development of the project by implementing aspects of the events, lists, and profile page functionality.

Part 1: Events

Finalise the main functionality for creating events and viewing event pages (refer to my practical example as a guideline for how to create event pages). This must include the functionality for attending events (including uploading images), editing event information, and viewing the mini-feed of the images, ratings, and reviews of all attendees.

You must also finalise the interface for selecting a category and adding hashtags, although you may still use placeholder functionality for this.

Part 2: Lists

Create the basic functionality for creating a list of events. Users should be able to create lists, add a name and description, and add events. You will also need to finalise the interface for accessing lists.

Part 3: Profile Page

Create the functionality for being able to view users' profile pages. These should display all relevant user information as listed in the specification and a user should be able to edit their own information in a logical manner.

You must also finalise the interface for adding friends and for sending messages, although you may still use placeholder functionality for this.

Bonus

You will receive bonus marks for any extra functionality, i.e., any functionality that is in the main specification but not listed in either deliverable specifications.

Visual design requirements

- Use the feedback from the D1 marking session to improve the visual design of your website.
- **Everything** must be styled, i.e., your profile page, your event pages, your list pages, etc.
  - You will lose marks if any of the required functionality/pages do not have styling that is consistent with your overall visual theme/design.
  - You will lose marks if there is any default Bootstrap visible in your forms or newsfeed.

Additional Information

- You must upload to **imy.up.ac.za.** Server details are available on ClickUP.
- All the files that you upload to the server **must also be submitted on ClickUP** according to the submission instructions in the spec. That means that your database must also be exported and included in your submission.

Submit all the files for this deliverable on the IMY server and ClickUP.
